About National Masonry®

With a proud history encompassing our manufacturing past as Boral Masonry before 2013, National Masonry® has firmly established itself as the industry leader with exceptional product quality and outstanding customer service with a clear vision of customers for life. We are obsessed with ensuring every customer has a memorable experience with us and to leave you with no doubt that you have made the right choice.

National Masonry®, the benchmark in masonry.

Product Disclaimer: Concrete Blocks, Bricks, Pavers and Retaining Wall products supplied by National Masonry® are manufactured using raw materials that inherently vary in nature. Whilst all effort is made to produce uniformity in our range of products, variation in colour, texture, and finish can be present. The dimensional characteristics of all products are nominal and variations in length, height, and width can occur from unit to unit which needs to be taken into consideration when installing these products.

Architectural Designer Range Overview

Create groundbreaking spaces of distinction with National Masonry's Architectural Designer Range. Designer Blocks are available in Smooth, Shot, Honed, Polished or Split Face finishes. Designer Bricks are available in Smooth, Shot or Polished finishes and the same range of standard made to order colours. We are also happy to work with designers on custom colours for large projects.

Value Added Finishes

Value added (Shot, Honed, Polished and Split Face) Designer Blocks are supplied as single face products unless extra faces are value added at your request (except products which are specifically stated as being Value Added on 2 faces or otherwise). The reverse side of Split Face blocks is not suitable for face work and cannot be value added. When only one face is value added, the back side of the block may not be suitable as a face finish due to the value adding process. If both faces are value added, both faces will be suitable for face work but care will be required when laying as there may be 2-5mm difference in the width of the individual blocks due to the various value adding processes.

Important Designer Range Information

Lead Time – As Designer Block and Designer Brick is generally made to order, lead times apply to all orders for these products. Longer lead times apply to Honed, Polished, and Shot finishes. Please phone us to confirm our current lead times.

Colour and Texture Variation – Some variation in colour of blocks, aggregates and texture may occur due to natural variations in raw materials. Colour variation can also occur from batch to batch making it essential to order all product requirements at the same time. National Masonry® recommends fractional blocks are cut on site to maintain colour consistency. **Blocks can be cut to order.**

Blending – To obtain a consistent finish and mitigate colour variation, National Masonry® strongly recommends "blending" which is drawing product from multiple pallets on-site.

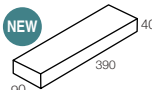

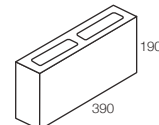

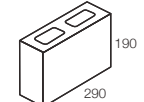

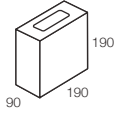

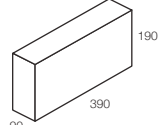

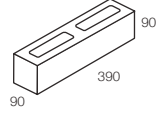

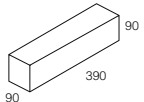

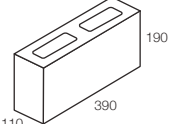

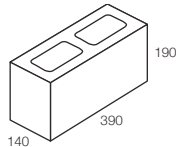

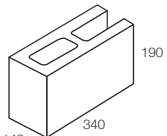

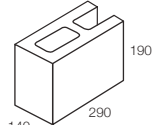

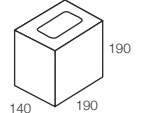

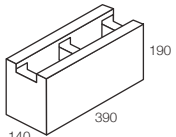

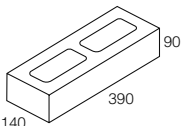

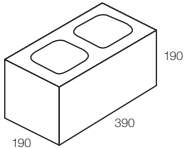

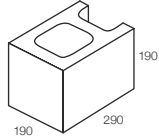

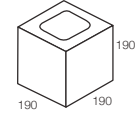

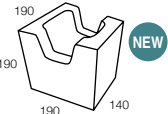

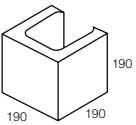

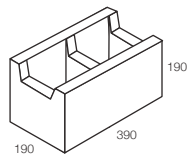

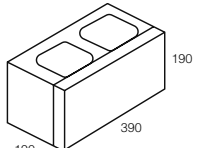

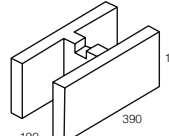

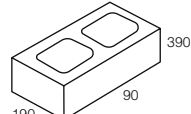

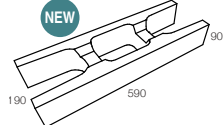

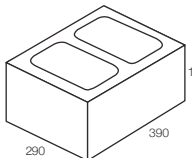

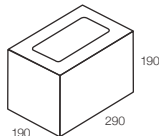

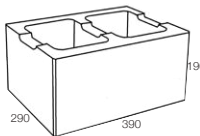

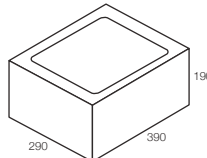

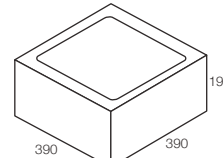

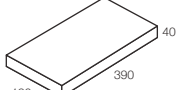

Laying – Care must be taken by the bricklayer to keep Designer Blocks and Designer Bricks free of mortar smears and drips while laying, as heavy mortar stains can be difficult to remove without permanently damaging the surface.

Storage – Designer Blocks and Designer Bricks must be kept dry on site before use and when laid. Freshly laid walls must be covered overnight and when rain interrupts work in order to prevent mortar stains and excessive moisture entering exposed cavities. Failing to do this will increase the likelihood of efflorescence.

Mortar – Coloured Designer Range blocks (but not Designer Brick) contain an efflorescence inhibitor. To complete the system, an additive must be used in mortar mix. National Masonry® supply and recommend TECH-DRYAD Mortar Additive. The consumption of additive varies significantly, 20 litres of mortar additive may lay approximately 1000-1500 Tech Dry Blocks.

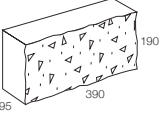

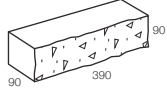

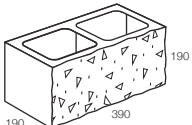

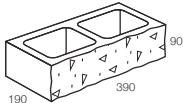

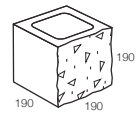

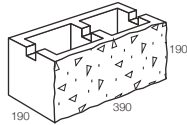

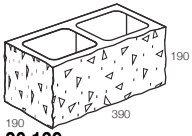

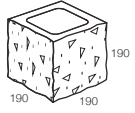

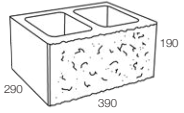

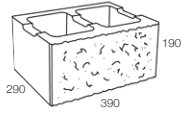

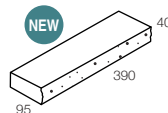

Sealing – All Designer Blocks should be cleaned and sealed with a quality sealer after installation. Failure to do so dramatically increases the likelihood and severity of efflorescence and general staining.

See our Architectural Designer Block brochure or visit our website at www.nationalmasonry.com.au for more information, laying, cleaning and maintenance guides and extensive photo galleries

Smooth Face

A finely textured finish created through the standard moulding process.

Shot Face

This process aggressively exposes the aggregates, producing a gritty, heavily textured, etched finish and softer colours.

Honed Face

The honed process grinds 2-3mm from the block surface, producing a matt exposed-aggregate finish.

Polished Face

This involves producing a denser block which is honed and then buffed to a glass-like, reflective surface which enriches the colours of the sands and aggregates.

Split Face

The splitting process produces a bold textured, exposed aggregate finish.

Cubic Breeze Blocks NEW

Cubic Breeze Blocks are 290x290x90mm and available in either Smooth Grey or Smooth White

Do you need high strength, high loadbearing walls? National Masonry's Heavy Duty Masonry™ range is your new solution. Now you can have the flexibility of masonry construction in applications where high compressive strength of up to 40MPa is required. Made specifically for your project, please check current lead times for manufacturing when you order.

* Minimum order quantities and lead times apply

Call for more information

National Masonry Natural Grey Light Weight Concrete Blocks are manufactured utilising a carefully formulated blend of recycled ash to reduce cement, sand and stone content while providing a lightweight, high strength product. These industry leading, high quality Grey Blocks are commonly used for construction of houses, retaining walls, schools, shopping centres, sporting venues and an enormous variety of small to major projects around Australia. Choosing the right block is important. Before selecting, you should ensure this product meets your project's requirements for properties such as fire rating, sound transmission or compressive strength. Please consult National Masonry if you are unsure on the type of masonry block required for your construction needs.

Block & Brick Estimator	Full Height	Half Height	Standard Brick	Quick Brick
Masonry unit face size (L x H mm)	390 x 190	390 x 90	230 x 76	230 x 162
No. Units per m ²	12.5	25	50	25

Material Quantities for 1m³ of Mortar

- For every 800 full height blocks (390 long x 190 high) or 64m² of wall, approximately 1m³ of mortar mix is required, allowing for wastage.

	Grey Block		Designer Range	
	Mix in 1 : 1 : 6 proportions		Mix in 1 : 5 proportions	
M3	Cement	14 bags (20kg each)	Cement	16 bags (20kg each)
	Lime	5 bags (20kg each)	Designer Range Additive	8 litres
	Sand	1.2m ³	Sand	1.2m ³
	Mix in 1 : 0.5 : 4.5 proportions		Mix in 1 : 4 proportions	
M4	Cement	18 bags (20kg each)	Cement	20 bags (20kg each)
	Lime	3 bags (20kg each)	Designer Range Additive	27 litres
	Sand	1.2m ³	Sand	1.2m ³

Note: Use clean, sharp sand and allow 20% for bulking.

Grout for Core Filling

The correct grout specification (mix design) is critical to achieving the structural design of a reinforced wall. The grout used to fill the cores of blockwork walls should be specified as follow:

- Grout to comply with AS3700 Clause 10.7.
- Characteristic Compressive Strength 20MPa.
- Cement content not less than 300kg/m³.
- Round aggregate (if any) not more than 10mm.
- Clean sand (1.2m³)
- A pouring consistency which ensures that the cores are completely filled and the reinforcement completely surrounded without segregation of the constituents.

Control Joints

Because of temperature variations and the shrinkage in a concrete masonry wall after construction, it is necessary to provide control joints in blockwork at a max spacing of 6m and at points of potential cracking, e.g. beside openings and at large steps in wall or footing.

- Joint width is 10mm for panels up to 6000mm long.
- Joint sealants should be applied towards the end of construction to minimise the effect of panel movement.

Core Fill Quantities	
Block Type	Blocks per m ³ of Grout
15.01	230
15.48	210
20.01	150
20.48	125
30.01	90
30.48	69
40.925	50
